SUMMARY

Flutter Developer with 4+ years of experience building scalable cross-platform applications using Clean Architecture and BLoC/Getx/RiverPod. Experienced in delivering production-ready apps, integrating REST APIs and Firebase, and optimizing performance. Strong focus on maintainable architecture and CI/CD automation.

SKILLS

- **Languages**
  - Dart, Kotlin (basic), Swift (basic)
- **Frameworks**
  - Flutter (Material, Cupertino)
- **AI-assisted development**
  - Antigravity, Cursor, Claude Code (used for prototyping and refactoring)
- **Architecture & State Management**
  - Clean Architecture, BLoC, GetX, Riverpod (basic)
- **Backend & APIs**
  - REST APIs, Firebase (Authentication, Firestore, Cloud Functions, FCM)
- **Tools & DevOps**
  - Git, GitHub, GitLab, Bitbucket, Codemagic, GitHub Actions, Fastlane, Shorebird (OTA Updates)
- **Databases**
  - Hive, SQLite (sqflite), Drift
- **Testing & Debugging**
  - Unit Testing, Widget Testing, Integration Testing, Flutter DevTools, Sentry, Testsprite

PROFESSIONAL EXPERIENCE

❖ **Flutter Developer | Pixel Tech (Sultanate of Oman)** *May 2025 – April 2026*

- Developed and launched cross-platform mobile applications using Flutter for iOS and Android.
- Designed scalable architectures using Clean Architecture and BLoC, improving code maintainability and team collaboration.
- Integrated REST APIs and Firebase services to build real-time, data-driven features.
- Improved app performance by identifying bottlenecks, reducing load times and crash rates.
- Modernized legacy applications by upgrading dependencies and refactoring outdated code.
- Implemented CI/CD pipelines using Codemagic, reducing manual deployment effort and speeding up release cycles.
- Reduced production bug-fix time by implementing Shorebird for over-the-air updates.

❖ **Freelance Flutter Developer | Self-Employed** *August 2022 – Present*

- Delivered custom Flutter applications for multiple clients, managing the full development lifecycle.
- Built scalable app architectures using BLoC and GetX for maintainability and future expansion.
- Integrated REST APIs and Firebase services to develop secure and responsive applications.
- Collaborated with clients to translate business requirements into technical solutions.

- Delivered MVPs on time while maintaining high code quality and performance standards.

PROJECTS

❖ Gym Zones — Fitness Discovery & Subscription Platform

Pixel Tech | Play Store & Apple Store

https://play.google.com/store/apps/details?id=com.pixllmall.gym_zones&hl=en

https://apps.apple.com/us/app/gym-zones/id6472092672

- Built a location-based application using Google Maps SDK to help users discover nearby gyms.
- Developed a subscription system enabling users to browse and purchase memberships.
- Designed responsive UI with custom widgets and animations for better user engagement.
- Optimized API performance using Dio, ensuring fast and reliable data loading.

❖ OmnSale — Marketplace & Trading Platform

Pixel Tech | Play Store & Apple Store

https://play.google.com/store/apps/details?id=com.pixllmall.sooq.sooq_sale&hl=en

https://apps.apple.com/om/app/omn-sale/id6449763653

- **Developed a marketplace app allowing users to post and browse items in real time.**
- **Implemented state management using GetX for dynamic UI updates and complex workflows.**
- **Integrated Firebase Cloud Messaging (FCM) for real-time chat and notifications.**
- **Built advanced search and filtering features to improve user experience.**

❖ kzdora —Traveling App

Freelance | Play Store | https://play.google.com/store/apps/details?id=com.kzdora
Built a travel assistance application to help tourists and visitors discover locations and services in Syria.

- Implemented state management using Bloc for dynamic UI updates and complex transaction workflows.
- Integrated Firebase Cloud Messaging (FCM) for real-time chat and push notifications.

EDUCATION

- **Bachelor's Degree in Information Technology** — Syrian Virtual University (2025)

CERTIFICATIONS

- **Developing Back-End Apps with Node.js and Express** — Coursera (2025)
- **Developing Front-End Apps with React** — Coursera (2025)
- **Django Application Development with SQL and Databases** — Coursera (2025)
- **Python for Data Science, AI & Development** — Coursera (2024)
- **Developing AI Applications with Python and Flask** — Coursera (2024)

- **Introduction to Containers w/ Docker, Kubernetes & OpenShift** — Coursera (2024)
